## EDUCATION

### Tongji University (Tongji), Shanghai, China

Sep 2022 - Mar 2025

M.S.Transportation Engineering (Intelligent Vehicles track)

- GPA: 4.56/5.00
- Focus on the safety of autonomous vehicles in long-tail environments. Specifically includes safety-critical scenario generation, safety evaluation of autonomous vehicles, and self-evolve mechanism for decision-making algorithms.
- Advisor: Prof. Yanjun Huang
- Core Courses: Traffic Engineering (5.0/5.0), Transport Data Analysis and Application (5.0/5.0), Principles of Artificial Intelligence (5.0/5.0)

### Jilin University (JLU), Changchun, China

Sep 2017 - Jun 2021

B.Eng. Automotive Engineering

- GPA: 3.71/4.00 | JLU Outstanding Student
- Core Courses: Differentiation and Integration (4.0/4.0), Probability Theory and Mathematical Statistics (4.0/4.0), Calculation Method (4.0/4.0), Maths Experiment (4.0/4.0), Automotive Theory (4.0/4.0), Vehicle Construction (4.0/4.0), Electrical Engineering (4.0/4.0), C Program Design (4.0/4.0), Principles of Mechanics (4.0/4.0), Fundamentals of Computer Technology (4.0/4.0), Fundamentals of Control Engineering (4.0/4.0), Microcomputer Principle and Interface Technology (4.0/4.0)

## RESEARCH EXPERIENCE

### Self-Evolving Learning-Based Autonomous Driving System: Safety-Critical Scenario Generation for Autonomous Driving Algorithm | Tongji University | Directed by Prof. Yanjun Huang | Supported by National Key Research and Development Program (the highest level of R&D programme in China)

Sep 2022 - Present

- Proposed a risk-guided policy optimization method for safety-critical scenario generation, which generates more diverse and plausible scenarios more efficiently.
- Proposed an adversarial traffic participant behavior model combining traffic prior and reinforcement learning, which solves the limitation that adversarial scenario generation can only be applied to specific working conditions.
- Proposed a safety-critical scenario generation method combining dynamic and static scenario parameters, which greatly improves the efficiency of scenario generation.
- Working on quantifying the diversity of scenarios and improving the diversity in safety-critical scenario generation for a comprehensive evaluation of autonomous vehicles.
- Working on combining naturalistic driving data with adversarial scenario generation to improve the naturalness and plausibility of the generated scenario.

### Adaptive Evolution and Evaluation of Secure and Confident Intelligent Systems: Safety Evaluation of Autonomous Driving Algorithms in Complex Environments | Tongji University | Directed by Prof. Yanjun Huang | Supported by the National Natural Science Foundation of China (NSFC).

Sep 2023 - Present

- Proposed an approach for the safety analysis of autonomous vehicles from complex safety-critical scenario data, which can intuitively reveal the distribution and characteristics of safety-critical scenarios for any given algorithm.
- Proposed a safety boundary online identification method that learns from the test data, which can enhance the safety of autonomous vehicles under a long-tailed environment.

Close-loop Self-Evolve Mechanism for Autonomous Vehicle Based on Mixed Reality Testing I Tongji University I  
Directed by Prof. Yanjun Huang I Supported by the Ministry of Education of China

Dec 2023 - Present

- Participated in constructing a mixed-reality simulation test platform by combining vehicle hardware-in-the-loop and virtual traffic scenarios.
- Working on the closed-loop self-evolve mechanism for autonomous driving algorithms under safety-critical scenarios.

Undergraduate thesis: Design of New Generation Chassis Vehicle and Analysis of Its Dynamic Performance I State  
Key Laboratory of Automotive Simulation and Control, Jilin University | Directed by Prof. Hsin Guan and Prof.  
Pingping Lu I Grades: 4.0/4.0 (Top 5%)

Sep 2020 - Jun 2021

- Designed a new chassis with four-wheel independent drive and four-wheel steering.
- Designed an algorithm for the torque distribution and steering angle control of each wheel considering maneuverability and stability.
- Vehicle dynamics simulation and its performance analysis based on Matlab/Simulink and CarSim.

Design of Automated Lane-Changing System for Intelligent Vehicle and Its Hardware-in-the-Loop Testing I State Key  
Laboratory of Automotive Simulation and Control, Jilin University I Directed by Prof. Bing Zhu

Sep 2018 - Jun 2020

- Designed a lane-change decision-making algorithm combining risk and efficiency and a lane-changing trajectory planning and control algorithm considering driving comfort and stability.
- Designed a hardware-in-the-loop testing platform, and tested and evaluated the designed automated lane-changing system.

TECHNICAL STRENGTHS

Languages Skills:

TOEFL iBT: 93 (Reading 23, Listening 23, Speaking 23, Writing 24)  
College English Test-6: 562/710 (Top 20%)  
College English Test-4: 581/710 (Top 20%)

Software Skills:

Carla, CarSim, Prescan

Development Tools:

Gym, PyTorch, TensorFlow

Programming:

Python, Matlab, Simulink, C/C++

ACADEMIC SERVICES & MENTORSHIP

Reviewers

IEEE Transactions on Intelligent Vehicles

Apr 2024 - Present

Part D: Journal of Automobile Engineering

Nov 2023 - Present

Mentoring

Haotian Chen (BS) Efficient Generation of Safety-Critical Scenarios for Autonomous Driving Decision Algorithms

Dec 2023 - Present

Jialei Nie (BS) Online Identification of Safety Boundaries for Autonomous Driving Decision Algorithms

Jan 2024 - Present

Peilun Han (BS) Diversity Enhanced Adversarial Scenario Generation Method

Mar 2024 - Present

HONORS & AWARDS

- Outstanding Graduate of School of Automotive Engineering, Jilin University (Top 5%)
- First Class Scholarship of Jilin University (Top 10%)
- First Class Scholarship of Jilin University (Top 10%)
- Outstanding Student of Jilin University (Top 10%)
- Outstanding Student Leader of Jilin University
- Second Prize in the Mathematical Modeling Competition for College Students in Jilin Province
- Outstanding Innovation and Entrepreneurship Program for College Students of Jilin University
- Outstanding Student of Jilin University (Top 10%)
- Outstanding Student Leader of the College of Automotive Engineering, Jilin University
- Second Class Scholarship of Jilin University (Top 15%)
- Second Prize in the National University Students Zhou Peiyuan Mechanics Competition in Jilin Province
- Outstanding Student of the College of Automotive Engineering (Top 15%), Jilin University
- Scholarships for Outstanding Work of The Student Union, College of Automotive Engineering, Jilin University
- Runner-up in Tongji University Basketball Tournament
- Runner-up in the Football Tournament in the School of Automotive Study, Tongji University

LEADERSHIP EXPERIENCE

Basketball Team of School of Automotive Study, Tongji University

Center/Forward

Student Union of College of Automotive Engineering, Jilin University

Head of Student Union Life Department

May 2023 - Present

Sep 2019 - Jun 2020
