EDUCATION

Tongji University (Tongji), Shanghai, China

Sep 2022 - Mar 2025

M.S. Transportation Engineering (Intelligent Vehicles track)

- GPA: 4.56/5.00 (88.9/100)
- Focus on the safety of autonomous vehicles for decision-making in long-tail environments. Specifically, safety-critical scenario generation, safety evaluation of autonomous vehicles, and self-evolve mechanism of decision-making algorithms.
- Advisor: Prof. Yanjun Huang (NSFC for Excellent Young Scholars)
- Core Courses: Traffic Engineering (5.0/5.0), Transport Data Analysis (5.0/5.0), Principles of Artificial Intelligence (5.0/5.0)

Jilin University (JLU), Changchun, China

Sep 2017 - Jun 2021

B.Eng. Automotive Engineering

- GPA: 3.71/4.00 (89.9/100 | JLU Outstanding Student)
- Core Courses: Mathematical Model (4.0/4.0), C Program Design (4.0/4.0), Fundamentals of Computer Technology (3.9/4.0), Advanced Mathematics (4.0/4.0), Probability and Statistics (4.0/4.0), Automobile Construction (4.0/4.0), Theory of Vehicle Control (4.0/4.0), Automobile Electronic Control Technology (4.0/4.0)

RESEARCH EXPERIENCE

Key Technologies for Self-Evolving Learning-Based Autonomous Driving Systems | Institute of Intelligent Vehicles, Tongji University | Directed by Prof. Yanjun Huang

Sep 2022 - Present

Supported by the National Key R&D Program of China under Grant No2022YFB2502900

- Proposed a risk-guided policy optimization method for safety-critical scenario generation, which generates more diverse and plausible scenarios more efficiently.
- Proposed an adversarial traffic participant behavior model combining traffic prior and reinforcement learning, which solves the limitation that adversarial scenario generation can only be applied to specific working conditions.
- Proposed a safety-critical scenario generation method combining dynamic and static scenario parameters, which greatly improves the efficiency of scenario generation.
- Working on quantifying the diversity of scenarios and improving the diversity in safety-critical scenario generation for a comprehensive evaluation of autonomous vehicles.

Adaptive Evolution and Evaluation of Secure and Confident Intelligent Systems | Institute of Intelligent Vehicles, Tongji University | Directed by Prof. Yanjun Huang

Dec 2023 - Present

Supported by National Natural Science Foundation of China under Grant U23B2061

- Proposed an approach for the safety analysis of autonomous vehicles from complex safety-critical scenario data, which can intuitively reveal the distribution and characteristics of safety-critical scenarios for any given algorithm.
- Proposed a safety boundary online identification method that learns from the test data under a long-tailed environment.

Self-Evolutionary Methods and Applications for Intelligent Systems in Complex Environments | Institute of Intelligent Vehicles, Tongji University | Directed by Prof.Yanjun Huang

Feb 2023 - Present

Supported by Fundamental Research Funds for the Central Universities , Ministry of Education of China

- Working on applying continual reinforcement learning methods to improve the self-evolution of autonomous driving algorithms under safety-critical scenarios.
- Working on combining naturalistic driving data with adversarial scenario generation to improve the naturalness and plausibility of the generated scenario.

Design of New Generation Chassis Vehicle Traveling System and Analysis of Its Dynamic Performance | State Key Laboratory of Automotive Simulation and Control, Jilin University | Directed by Prof.Hsin Guan and Prof.Pingping Lu

Sep 2020 - Jun 2021

- Designed a new chassis with four-wheel independent drive and four-wheel independent steering.
- Modeling of the vehicle dynamics and the distribution algorithm of steering angles and torques of four wheels.
- Vehicle dynamics simulation and its performance analysis based on Matlab/Simulink and Carsim.

Design of Active Lane-Changing System for Intelligent Vehicle and Its Hardware-in-the-Loop Testing | State Key Laboratory of Automotive Simulation and Control, Jilin University | Directed by Prof.Bing Zhu

Sep 2018 - Jun 2020

- Designed a lane change decision-making algorithm combining risk and efficiency and a lane-changing trajectory planning & control algorithm considering driving comfort and stability
- Designed a lane detection hardware-in-the-loop test platform

TECHNICAL STRENGTHS

Languages Skills:

TOEFL iBT: 93 (Reading 23, Listening 23, Speaking 23, Writing 24)
College English Test-6: 562/710 (Top 20%)
College English Test-4: 581/710 (Top 20%)

Software Skills:

Carla; Carsim; Prescan;

Development Tools:

Gym; Pytorch; Tensorflow;

Programming:

Python; Matlab; Simulink;

ACADEMIC SERVICES & MENTORSHIP

Reviewers

Part D: Journal of Automobile Engineering

Nov 2023 - Present

Mentoring

Haotian Chen (BS) Adversarial Scenario Generation Method for Arbitrary Working Condition.

Dec 2023 - Present

Jialei Nie (BS) Online Identification of Safety Boundaries for Autonomous Driving Decision Algorithms

Jan 2024 - Present

Peilun Han (BS) Diversity Enhanced Adversarial Scenario Generation Method

Mar 2024 - Present

HONORS & AWARDS

Outstanding Graduates of Automobile College of Jilin University First Class

Mar 2021

Scholarship of Jilin University

Mar 2021

Outstanding Student of Jilin University

Oct 2020

Outstanding Student Leader of Jilin University

Oct 2020

First Class Scholarship of Jilin Univesity

Oct 2020

Outstanding Student of Jilin University

Oct 2019

Outstanding Student Leader of the College of Automotive Engineering

Oct 2019

Outstanding Student of the College of Automotive Engineering Second Class

Oct 2018

Scholarship of Jilin University

Oct 2018

LEADERSHIP EXPERIENCE

Student Union of College of Automobile Engineering, Jilin University

Sep 2019 - Jun 2020

Head of Student Union Life Department
